CCNA: Cisco Certified Network Associate

JNCIS: Juniper Networks Certified Internet Specialist

PTE Academic - Overall Score: 90 (Superior English)

EXPERIENCE

Operational Service Officer

Apr 2024 - Present

Gold Coast University Hospital, Queensland Health | Gold Coast, QLD

- Trained and deployed across multiple operational roles including portage, cleaning (clinical and non-clinical), logistics, and ride-on equipment operation across a large tertiary hospital environment.
- Regularly redeployed mid-shift to cover critical areas when colleagues are absent or unavailable, demonstrating flexibility and reliability under operational pressure.
- Completed OVP Conflict Management and Challenging Behaviour Awareness training; applied de-escalation techniques to calm distressed patients, enabling clinical staff to continue care without disruption.
- Provided reassurance to a distressed patient during a clinical procedure by keeping her calm and engaged, which she later acknowledged with gratitude to staff.
- Remained on duty during a ward medical emergency to assist clinical staff until the situation was resolved, staying beyond scheduled hours when no other support staff were available.
- Proactively assisted overwhelmed colleagues by taking on additional tasks during peak periods, including transporting clinical waste to relieve a co-worker managing both portage and cleaning alone.
- Demonstrated accountability by self-reporting accidental equipment damage to management, ensuring prompt follow-up and maintaining a culture of transparency.
- Completed mandatory training including Child Protection, Safe Manual Handling, Safe People Handling, Speaking Up for Safety, Working Ethically, Infection Control Awareness, and Workplace Bullying and Harassment Awareness.

Assistant Manager and IT In-Charge

2018 - 2023

Virgo Air Industrial Supplies Inc. | Philippines

- Designed, built, and maintained the company database system covering sales, inventory, expenses, and financial records.
- Administered the full ICT environment as the sole IT person, including hardware setup, software installation, maintenance, user account administration, and network upkeep.
- Provided first-level technical support and troubleshooting for hardware, software, and network issues across the business.
- Trained non-technical staff on business systems and provided just-in-time support for day-to-day ICT needs.
- Continues to provide remote IT support for the business on an ongoing basis after relocating to Australia.

TECHNICAL SKILLS
