- CCNA: Cisco Certified Network Associate
- JNCIS: Juniper Networks Certified Internet Specialist
- Fortinet NSE 1-3
- VoIP/FreePBX coursework (complete)
- Data Centre coursework (complete)
- PTE Academic - Score 90 (Superior English)

## EXPERIENCE

ICT professional with five years as the sole IT lead of a small business, giving broad hands-on experience across desktops, applications, email, account security and devices. Now working in a large enterprise environment at Griffith University, with additional experience in a large tertiary hospital setting at Gold Coast University Hospital.

**Service Centre Technology Analyst (AV)**
*Griffith University, Gold Coast | Jun 2026 - Present*

- Work as an in-field technician, attending rooms across campus to diagnose and troubleshoot AV equipment issues on site, resolving faults over the network where possible.
- Administer network-level aspects of AV systems, including database updates, network routing, port management, and IP-based remote access and troubleshooting.
- Diagnose and repair faults across multiple AV platforms, including Q-Sys, Extron, and AMX, to keep systems running for classes and events.
- Reimage and remotely configure computers over the network.
- Install, configure, and replace AV and IT equipment on site, including routine maintenance of printers and other peripherals.
- Liaise directly with external vendors on equipment warranties, faults, and repairs.
- Communicate with academic and administrative clients regarding room bookings, event support, equipment requests, and issue resolution.
- Support live events when required by setting up mixers, speakers, microphones, cameras, and displays.
- Work within a small, close-knit team that relies on strong day-to-day communication to deliver an efficient service.

**Operational Service Officer (Casual)**
*Gold Coast University Hospital, Queensland Health | 2024 - Present*

- Provide casual operational support (approx. one shift per month) across porterage, logistics, and clinical/non-clinical duties within a large tertiary hospital.
- Apply OVP Conflict Management and Challenging Behaviour Awareness training to de-escalate and support distressed patients.
- Assisted clinical staff during a ward medical emergency, remaining on duty beyond scheduled hours to ensure continuity of support.
- Recognised for reliability, accountability, and flexibility under operational pressure.

**Assistant Manager and IT In-Charge**
*Virgo Air Industrial Supplies Inc., Philippines | 2018 - 2023*

- Sole IT lead for a small business for five years, managing the full ICT environment including hardware, software, network administration and the company database system.
- Installed, updated and maintained Windows 10 and Windows 11 and business applications across company desktops; built, upgraded and troubleshot desktop computers.
- Set up and maintained company phones, printers and a fingerprint scanner.
- Solely managed the company email and online profile, and secured the company's online accounts.
- Used Microsoft Word, Excel and PowerPoint daily, including scripts and code in Excel, and built Google Sheets and Apps Script sales and delivery tracking systems.
- Delivered first-level technical support and trained non-technical staff on core business systems.
- Continue to provide remote IT support to the business following relocation to Australia.
