EXPERIENCE

Network and telecommunications graduate (Advanced Diploma of IT, Telecommunications Network Engineering) holding three ACS Skills Assessments in network, systems and security roles. Currently an in-field technician at Griffith University, working on network-level aspects of AV systems including routing, port management and IP-based remote access. Previously the sole IT lead of a small business for five years, covering desktops, network administration, email and account security. Open to relocating anywhere in Australia.

Service Centre Technology Analyst (AV)
Griffith University, Gold Coast | Jun 2026 - Present

- Administer network-level aspects of AV systems, including network routing, port management, database updates, and IP-based remote access and troubleshooting.
- Diagnose and repair faults across Q-SYS, Extron and AMX platforms, resolving them over the network where possible and attending rooms across campus when on-site work is needed.
- Reimage and remotely configure computers over the network; install, configure and replace AV and IT equipment on site.
- Liaise with external vendors on equipment warranties, faults and repairs.
- Communicate with academic and administrative clients on room bookings, event support, equipment requests and issue resolution, and support live events with mixers, speakers, microphones, cameras and displays.
- Work in a small team that relies on strong day-to-day communication to deliver an efficient service.

Operational Service Officer (Casual)
Gold Coast University Hospital, Queensland Health | 2024 - Present

- Provide casual operational support across porterage, logistics, and clinical/non-clinical duties within a large tertiary hospital.
- Apply OVP Conflict Management and Challenging Behaviour Awareness training to de-escalate and support distressed patients.
- Assisted clinical staff during a ward medical emergency, remaining on duty beyond scheduled hours to ensure continuity of support.
- Recognised for reliability, accountability, and flexibility under operational pressure.

Assistant Manager and IT In-Charge
Virgo Air Industrial Supplies Inc., Philippines | 2018 - 2023

- Sole IT lead for five years, managing hardware, software, network administration and the company database system.
- Installed and maintained Windows 10 and 11 and business applications; built, upgraded and troubleshot desktops; set up and maintained company phones and printers.
- Solely managed the company email and online profile and secured the company's online accounts.
- Built Google Sheets and Apps Script sales and delivery tracking systems; delivered first-level support and trained non-technical staff on core business systems.
- Continue to provide remote IT support to the business following relocation to Australia.

EDUCATION

Advanced Diploma of IT (Telecommunications Network Engineering) *ICT60220*
Australian College of Information Technology

Certificate IV in Information Technology (Networking) *ICT40120*
Australian College of Information Technology
